The **Modular Network** for
increasing **circularity**

Value Proposition

EcoPontes is a one-stop-shop for effective recycling operation in low and middle income countries. It provides all required elements for long-term success. While convenient for our customers, it allows for flexibility through tailored solutions.

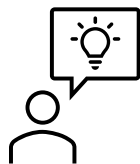

The Building Blocks

The EcoPontes Service Package consists of the following key building blocks. Additionally more elements can be included to provide a solution that is specifically tailored to individual needs:

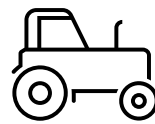

Operational Support and Optimizatziön

We stand for the quality of our offers and servies. We will answer all your questions and enquiries promptly.

Training for Success

Online or face-to-face training. We can provide both in line with your concept or to convey essential content using tired and tested concepts from our pool

Procurement of machinery

With our network we can find the right equipment or the right manufacturer for you. We can also arrange high quality second hand equipment.

Trading Network for recyclables

We are involved in several relevant associaions and our global network includes partners from all major industries and the recycling sector.

EcoLu EcoPontes Luanda

The Project *EcoLu – EcoPontes Luanda* is a feasibility study funded by the Export initiative for environmental technologies. Over the course of the project the EcoPontes Model will be implemented, assessed and iteratively improved.

Project Goals

- Establish a separate collection of recyclables via EcoPontes Collection Hubs.
- Investigate how actors along the value chain can achieve a professional and long-term successful operation.
- Set up a reliable network of buyers of the collected materials
- Develop guidelines, materials and tools for start-up and operation. To be available for any future EcoPontes Projects

About Us

Rodiek & Co GmbH is a consulting company in the field of waste management, recycling and circular solutions.

It is our Mission to support the development of a functioning circular economy by providing experience and operational knowhow.

Our target regions are developing economies, where waste management and recycling is still in its early stages. Our solutions are tailored to the specific local requirements and needs.

We provide services along the complete value chain from collection over sorting, to treatment and preparation for recycling.

We provide technical support for facilities, including vehicles, machinery as well as material flow management.

We also offer the development of sustainable recycling and energy concepts for local communities, businesses and industries.

As a 100% daughter company of Nehlsen Group, one of the largest German waste management and recycling companies, we can access the operational knowhow and practical expertise from 99 years of waste management and recycling business in Germany.
